- LaravelAgile CoachingFilamentPHPTraining

Tarbyh

Full-time · Remote

Aug 2025 — Present

- Founder
- Building an early-stage startup focused on growth and product-market fit.
- StartupsGrowth Hacking

PINC Technology Sdn Bhd

Shah Alam · Hybrid

1 yr 7 mos

- Technology Consultant
- Aug 2025 — Present · Contract
- TechOps implementations, cloud architecture, and DevOps operations setup.
- AWSCloud ArchitectureDevOps

- Software Architect
- Dec 2024 — Jul 2025 · Part-time
- Defined software and platform architecture for client systems.

Blacksmith

Shah Alam · Hybrid

Sep 2021 — Jul 2025 · 3 yrs 11 mos

- Full Stack Data Engineer
- Built a real-time streaming analytics service with Apache Kafka and Apache Flink, using the Kubernetes REST API to spin up pods per tenancy on GKE, provisioned via Terraform.

Implemented Apache Camel for source/sink integration and Ververica (Apache Flink) for real-time streaming analytics.
- Apache KafkaApache FlinkKubernetesTerraformGKE

COMMUNITY

iMoney Group

Kuala Lumpur

May 2018 — Aug 2020 · 2 yrs 4 mos

Senior Software Engineer

Jan 2020 — Aug 2020

- Frontend development across the product suite.

Software Engineer

May 2018 — Jan 2020 · 1 yr 9 mos

- Built microfrontends with Vue.js, Python Django, and Golang — split vertically per product (personal loan, credit card, home loan, insurance, broadband).
- Heavy AWS usage: Elastic Beanstalk, Amplify, RDS Aurora, S3, API Gateway, and Lambda.
- Delivered a new Bank UI for the Application Document Centre using serverless AWS SAM and AWS Amplify on Vue.

Vue.js

Golang

Django

AWS Lambda

JobStreet.com

Kuala Lumpur

Nov 2011 — May 2018 · 6 yrs 7 mos

Software Engineer

- Built and maintained hirer and job-seeker platforms (SiVA, Talent Search) using PHP, Laravel, ASP.NET, and AngularJS across Agile/Scrum teams.
- Developed REST APIs (Laravel, Swagger), full-text search with Apache Solr, and async messaging via RabbitMQ — containerised with Docker.
- Delivered the Re-Engagement notification platform, migrating to AWS cloud and microservices (SNS, SQS, Lambda, Node.js, Databricks) with email, browser, mobile push, and chatbot channels.
